OSA-2745-62

MEMORANDUM FOR : Assistant Director, Office of Elint, DD/R

SUBJECT : Request for Tasking of Project [REDACTED]

25X1A

1. During recent discussions between the Engineering Analysis Division, OSA, and [REDACTED] the question arose concerning which geographic areas containing TALL KING radars were of prime interest to this Agency. Since these radars along the periphery of the Soviet Union are more easily [REDACTED] it appears axiomatic that the [REDACTED] schemes should be brought to bear on the ROB within the interior. The OSA further has the specific requirement to establish a TALL KING ROB for the interior.

25X1A

25X1A

25X1A

2. It is therefore requested that the [REDACTED] effort be tasked specifically to establish TALL KING ROB for the interior of the Soviet Union and other locations, such as the southern border, where the TALL KING radar is not known to be deployed.
